ASSIGNMENT 6

Title: Embedded C program for timer programming ISR based buzzer on/off.

Objective : To learn interfacing of buzzer with PIC 18FXXX microcontroller

Problem statement: Write an Embedded C program for timer programming

Input:

```
#include<pic18f4550.h>
#define Buzzer LATAbits.LATA5
unsigned int count = 0;

void interrupt Timer1_ISR()
{
	if (TMR1IF==1)
	{
		//TMR1=0xCF2C;
		TMR1L = 0x20;
		TMR1H = 0xD1;
		count ++;

	if (count >= 1000)
	{
		Buzzer =~ Buzzer;
		count = 0;
		}
	TMR1IF = 0 ;
		}
```

```
}

void main()
{
	TRISB=0;
	TRISAbits.TRISA5 = 0;    //set buzzer pin RA5 as output
	GIE=1;
	PEIE=1;
	TMR1IE=1;
	TMR1IF=0;

/* enable 16 bit TMR1 register,no pre scale,internal clock,timer off */

	T1CON=Ox80;
	TMR1L=0x20;
	TMR1H=0xD1;
	TMR1ON=1;

	while(1);
}
```
