

1. Write an Embedded C program to add array of n numbers
2. Write an Embedded C program to transfer elements from one location to another for following:
 - a. Internal to internal memory transfer
3. Write an Embedded C program to interface PIC 18FXXX with LED & blinking it using specified delay
4. Write an Embedded C program for Timer programming ISR based buzzer on/off
5. Write an Embedded C program for LCD interfacing with PIC 18FXXX
6. Write an Embedded C program for Generating PWM signal for servo motor/DC motor
7. Write an Embedded C program for Temperature sensor interfacing using ADC & display on LCD
8. Write simple program using Open source prototype platform like Raspberry-Pi/Beagle board/Arduino for digital read/write using LED and switch Analog read/write using sensor and actuators
9. Write an Embedded C program to add array of n numbers
10. Write an Embedded C program to transfer elements from one location to another for following:
 - a. Internal to internal memory transfer
11. Write an Embedded C program to interface PIC 18FXXX with LED & blinking it using specified delay

12. Write an Embedded C program for Timer programming ISR based buzzer on/off
13. Write an Embedded C program for LCD interfacing with PIC 18FXXX
14. Write an Embedded C program for Generating PWM signal for servo motor/DC motor
15. Write an Embedded C program for Temperature sensor interfacing using ADC & display on LCD
16. Write simple program using Open source prototype platform like Raspberry-Pi/Beagle board/Arduino for digital read/write using LED and switch Analog read/write using sensor and actuators
17. Write an Embedded C program to interface PIC 18FXXX with LED & blinking it using specified delay
18. Write an Embedded C program for LCD interfacing with PIC 18FXXX
19. Write an Embedded C program for Generating PWM signal for servo motor/DC motor
20. Write simple program using Open source prototype platform like Raspberry-Pi/Beagle board/Arduino for digital read/write using LED and switch Analog read/write using sensor and actuators
21. Write an Embedded C program for Timer programming ISR based buzzer on/off
22. Write an Embedded C program to transfer elements from one location to another for following:
 - a. Internal to internal memory transfer

23. Write an Embedded C program to interface PIC 18FXXX with LED & blinking it using specified delay

24. Write an Embedded C program to add array of n numbers

25. Write an Embedded C program for Timer programming ISR based buzzer on/off
